Susan:

We are still have difficulty with the Falcon Refinery progress (or no progress at all). They seem to be in line for a loan but have been since February/March and as far as I know, it has not been released. The money appears to be built around retrofitting the tanks and no cleanup at this time.

Since this site is on the NPL then I can theoretically have access to up to \$6 M along with getting a 1 year exemption. We have \$ 500K from the letter of credit.

I am having difficulty delaying this much more. We need to discuss this further.

Thanks

Gary Moore
